

FORTÉ®

POLYESTER SEALANTS

Description

Rollprint's Forté® polyester sealants are extrusion coated weld seal polyester formulations that can be applied to polyester, nylon, or foil substrates. They have excellent chemical resistance, are ideal for high temperature applications, and are chemically very clean.

Market Applications

Forté® polyester sealants are used in lidding and overwrap applications which require excellent chemical or thermal resistance.

Product Name	Weld Seals To					Chemical Barrier	Aroma Barrier	Retort/ Autoclave	Clarity	Cost
